

Laboratory & Analysis

Testing and analysis available at Innovation Update's™ laboratory. Utilizing Pearce Plastics's™ manufacturing capabilities, small and medium runs are available for testing purposes. We have the unique ability to incorporate various solutions to your product's™ need. Products can be modified based on customer needs " custom orders are available.

Tools of the trade:Â Â Â Â

Innovation Update has generic experimental tooling to provide the proper venting so products do not leak, if the right vent and liner are used and torque is applied, success is 99%. We provide testing and assistance for most products that qualify to be used with The Pearce Venting Technology.

Samples are available to qualified companies. Call today for more information about the use of the samples and request a kit for your trial.Solutions & Chemicals in Various Phases of Testing

- Peroxide Base Product
- Sodium Hypochlorite Base Products
- Alcohol Base Products
- Acid Compounds
- Motor Treatment
- Benzoic Products
- Rigid Packaged Food
- Animal Care Products
- Plant Foods
- Hair Dyes
